Art Unit: 1653

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 20, and 37 drawn to gamma subunit of a porcine AMP-activated kinase (AMPK) and a method of use thereof.

Group II, claim(s) 11-17, 21-23, 26-27 drawn to DNA sequences encoding said subunit, primers for amplifying said sequences, vectors and host cells comprising said sequences and a method of use of said DNA sequences.

Group III, claim(s) 18, and 35 drawn to transgenic comprising said DNA sequences optionally before deletion as well as method of use thereof.

Group IV, claims 19 and 36 drawn to knockout animals and method of use thereof

Group V, claim(s) 24-28, drawn to methods of identifying a polymorphic locus in chromosomal sequences using said primers.

Group VI, claims 29-33, drawn to a method of detecting dysfunction of carbohydrate metabolism resulting from the expression of a functional altered allele using primers.

Group VII, claim(s) 34, drawn to methods of screening for modulators of said DNA sequences.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features of Groups I-IV are polypeptide, DNA, transgenic animal and knockout animal respectively, which are each directed to products of unrelated chemical structure and function.

Art Unit: 1653

Groups I, V, VI, and VII all share a common special technical feature but said inventions are not required to be rejoined under PCT Rule 13.1 because Group I already has a method of use of DNA.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
